### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: Applicant has amended claims to incorporate the allowable features indicated in the previous Office Action. Specifically, none of the prior art teach, among other things, the following limitations:

- The reception completion determination means includes a counter for counting a number of input pulses included in the communication clock signal, and for outputting the reception completion signal when a count value of the counter reaches a predetermined number as required by claim 2.
- The reception completion determination means monitors the serial data for a special bit added to the serial data and outputs the reception completion signal when the special bit is detected as required by claim 3. And,
- The data processor including an oscillation control unit for generating an oscillation command signal in response to receiving the reception completion signal from the reception completion determination device; and a control circuit for operating synchronously with the system clock signal and including an oscillation unit in communication with the oscillation control unit, the oscillation unit for oscillating to generate a system clock signal upon receiving the oscillation command signal from the oscillation control unit as required by claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2816
